

Alejandro Acosta

AI Product Engineer.

EXPERIENCE

2024.06 - Today - Full Time

Magoya

AI Product Designer / UX Engineer

Leading AI-assisted UX design for agro platforms serving Bayer and Biome Makers. Built and maintained Foundry, an internal design system, and developed an External Components Checker Figma plugin in TypeScript to enforce component governance across products. Working remotely from Argentina for USA and Spain.

2017.02 - Today - Part Time

Freelance Product Engineer & UX Educator

Engineered and shipped web products for SMB clients across Argentina using React, Next.js, HTML/CSS/JS, and PHP. Built AI-powered automation workflows including multi-agent content pipelines (Researcher → Strategist → Writer) and Playwright-based data scraping systems. Teaching UX/UI at Coderhouse.

2023.08 - 2023.11 - Full Time

340Best

Lead UX Designer

Led end-to-end redesign of the Infopoint web app. Applied design sprint methodology to ship a production-ready UX overhaul, ensuring functional consistency and visual coherence across the platform.

2021.06 - 2023.08

IQVIA

Product Designer

Built a web-based CMS platform for healthcare brands, collaborating with cross-functional engineering teams to create systems for storing, reusing, and distributing content at scale.

2019.02 - 2021.06

Mercadolibre

Product Designer · Design Systems

Designed scalable design system components for marketing dashboards. Ensured consistency and visual coherence across data-heavy interfaces using Figma, Adobe XD, and Tableau.

ABOUT ME

Designer who codes, engineer who ships. I work end-to-end — UX, frontend, and AI automation — building the product instead of handing off a mockup. Recent work: multi-agent content pipelines, automated data portals, and a TypeScript Figma plugin governing design systems at scale.
